HASSAN SHAFIQ

CAREER OBJECTIVE

Final-year Computer Science student and self-taught developer with hands-on experience building and shipping real-world software, including a production-ready desktop POS application and a live client website. Skilled in React, Next.js, and Flutter, with a growing interest in cybersecurity through coursework in Information Security. Seeking an internship to apply these skills in a professional environment and continue growing as a developer.

FEATURED PROJECTS

Posify — Offline-First POS Desktop Application

React, TypeScript, Tauri, SQLite, Supabase

- Built a full offline-first Point of Sale system for Pakistani retail businesses, with local SQLite storage and two-way cloud sync to Supabase.
- Implemented stock sync, device-limit enforcement, an auto-updater, and multi-tenant data isolation; led a full pre-launch audit fixing critical issues.

Safa Al Ibda — Client Business Website

Next.js, Tailwind CSS, SEO

- Built a responsive, SEO-optimized website for a Saudi Arabia-based client as a freelance project, including JSON-LD schema and Google Search Console setup.
- Managed a custom domain migration with 301 redirects and sitemap submission.

Home Chef — Cross-Platform Mobile Marketplace

Flutter, Dart, Supabase, REST APIs

- Built a mobile marketplace app connecting home chefs with customers, featuring real-time chat and Supabase OTP-based authentication.
- Integrated third-party REST APIs for dish image search and resolved critical issues through a structured code audit.

KEY STRENGTHS

Self-directed learner who independently designs, builds, and ships production-grade software end-to-end — from architecture to deployment.

CERTIFICATIONS

Introduction to Artificial Intelligence — Foundational course covering core AI concepts.
